NAME

curl_formfree - free a previously build multipart/formdata HTTP POST chain

SYNOPSIS

#include <curl/curl.h>

void curl_formfree(struct curl_httppost * form);

DESCRIPTION

curl_formfree() is used to clean up data previously built/appended with $curl_formadd(3)$. This must be called when the data has been used, which typically means after $curl_easy_perform(3)$ has been called.

RETURN VALUE

None
